

NIFTY 50 Dashboard - Today's Work (map)

2026-06-25 . live as of 2026-06-19, NIFTY 23961 . <http://10.10.7.70:3000/our-models>

1) Live forecast (NEW)

Big LIVE FORECAST added at the top.
Next 1-10 trading days: Direction + Volatility, each with a confidence %.
Trust VOLATILITY; direction is weak.
e.g. +5d: VOLATILE 52% (CALM/VOLATILE).

Fresh data (Python)

Built daily features in Python,
added 10 new days -> now to 19-Jun.
Forecast projects Jun 22 -> Jul 3.

2) Predictions table fixed

Tick now matches the prediction.
Shows BOTH calls side by side:
DIRECTION (up/down/flat) +
VOLATILITY (calm/stormy),
each with its own tick.

TODAY'S WORK

Made the dashboard easier to
TRUST and easier to READ.
4 changes + fresh data.

3) Monthly behaviour filled

Last 21 rows were blank (-).
Needed 21 future days; now read
the real outcome from full price
history. Result: 0 blanks -
every row shows bull/bear/side.

Kept honest

Tested on unseen data; leak-checked;
no future peeking.
Volatility edge ~58-77%; direction ~35%
(near random, shown LOW-trust).

4) Market chart made regular

Was uneven (few points over 10 yrs,
big gaps + huge price range).
Now last 120 back-to-back candles -
even, clean chart for intraday /
weekly / monthly.
